## **DETAILED ACTION**

### ***Claim Objections***

Claim 14 is objected to because of the following informalities: negative limitation such as "comprises no fuel cell" makes the claim indefinite since it does not fall under the 'metes and bound' of the claim. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 2, 4-15 and 22-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Consadori et al. (US 2005/0141154). The reference discloses a power load management system having, *inter alia*, multiple input power source inlets 222, 224 and multiple output power load outlets 171-178. The system selects which power source and which outlets are being used. Moreover, it mentions that the input power source maybe batteries and maybe rechargeable. It is however failed to disclose the battery being a primary or non-rechargeable battery. It would have been obvious to one having ordinary skill in the art to replace one of the input power sources with a non-rechargeable battery since its input power source is an ac-type power source (i.e. non-rechargeable battery) for the purpose of providing clean and non-pollutant power and since it has been held to be within the general skill of a worker in the art to select a

known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

### ***Allowable Subject Matter***

Claims 16-21 are allowed. The prior art made of record fails to disclose or suggest a charging selection source.

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
